Clifton  
Bristol 8.

April 3rd.

Dear Paul,

Your letter has eventually been forwarded to me here where I am still convalescing. I am sorry about the Catalan business. I was unfortunately, as you know, taken ill at the middle of term. Just before I went sick I had been trying to get hold of Batista about exactly, with scant success. However, the Saturday before I left Cambridge he came here and although it is really in no state for writing I tried to find out what had been done.

He had that day (the last Schindler's)  
got a letter meeting over the (over  
Fluch) but she looked at the  
Aylo Catalan he seems optimistic  
but didn't seem one there due  
and. I had his looks do with  
as I was looking out of action but  
Says that the better of a command  
is urgent. Now the letter comes to  
Dr Brittain (James) Dr T. P. Spalding,  
St. Catharines - Dr. Steel, ~~Command.~~  
Steel will be away for the last week  
of term. I am going to the sea today  
to try, get some work to lecture,  
but I don't think I'll be able to do  
much on the Aylo Catalan affair  
long week distance. I could perhaps  
get a room in Gt. St. Schindler  
St. Catharines, organize a lunch  
party on the Saturday - but also

• fix up any women who are coming;  
Can you let me know how long  
Also, it seems true that an arrangement  
might be made with a hotel.

What about getting in touch with  
the Blue Broom & asking them what  
was the their terms? Or the heirs?  
I should love to get the letter and

have given reasonable terms for  
whether if you job - to it fast.

log 2 - contact (-) Jack  
Stark (4) Topsheld, as if they  
can fix it - pass the live in  
Cambridge. I think he is good  
about 14 what so could be  
eye them - but but I am sure  
doctors orders both the mission will

Dear Professor Tressie Patz  
I'm glad to hear that you  
are trying to arrange to see  
Frank in Chicago. Rose Termini  
is going on in April 10th & she  
will be able to help a bit (I  
understand that Betate has  
not seen the gas plates either!  
I'd like to see the things  
that best pneumonia I don't  
do with.

Yours in haste

Helena Grant.
