NEW BOOK ANNOUNCEMENT

THE PSYCHOLOGICAL MECHANISMS OF LANGUAGE

TITLE:	THE PSYCHOLOGICAL MECHANISMS OF LANGUAGE	ISBN:	0-85403-172-3
AUTHORS:	As below	FORMAT:	297 x 210 mm
IMPRINT:	The British Academy and the Royal Society	EXTENT:	212 pages
		BINDING:	Case
		PRICE:	£23.30 (United Kingdom) £24.55 (Abroad) Postage included.

PUBLICATION DATE: 23 October 1981.

CONTENTS: This book contains the proceedings of a joint meeting of the Royal Society and the British Academy, held in March 1981.

The contributors come from several different disciplines: philosophy, linguistics, cognitive science, and the relevant branches of theoretical, experimental and clinical psychology. They were selected, not only for their eminence in their own field of specialization, but also for their ability to relate their work to the general purpose of constructing a theoretically adequate account of the psychological mechanisms underlying the acquisition, storage and use of language. Research directed towards this goal has made considerable progress in recent years, making the time ripe for an interim report. Many of the chapters give an up-to-date account of developments in particular fields. Taken together, they will serve the interests of both specialists and non-specialists.

J. LYONS, F.B.A., Language and Speech; N. CHOMSKY, Corresponding F.B.A., Knowledge of language: its elements and origins; L. J. COHEN, F.B.A., Some remarks on the nature of linguistic theory; A. J. P. KENNY, F.B.A., Language and the mind; N. V. SMITH, Grammaticality, time and tense; G. GAZDAR, On syntactic categories; JANET D. FODOR, Does performance shape competence?; H. C. LONGUET-HIGGINS, F.R.S., Procedural theories of linguistic performance; W. J. M. LEVELT, The speaker's linearization problem; W. D. MARSLEN-WILSON AND L. K. TYLER, Central processes in speech understanding; J. MEHLER, The role of syllables in speech processing: infant and adult data; P. N. JOHNSON-LAIRD, Comprehension as the construction of mental models; D. E. BROADBENT, F.R.S., Perceptual experiments and language theories; J. MORTON, The status of information processing models of language; D. A. ALLPORT AND ELAINE FUNNELL, Components of the mental lexicon; ELIZABETH K. WARRINGTON, Neuro-psychological studies of verbal semantic systems.

ORDERS TO: The British Academy, Burlington House, Piccadilly, London W1V 0NS or The Royal Society, 6 Carlton House Terrace, London SW17 5AG.
